

EUS Australia 2018

Advances in EUS Guided Endotherapy Meeting

13 April 2018 - 14 April 2018

The New Royal Adelaide Hospital, Cnr. West Terrace & North Terrace, Adelaide SA

Who should attend?

The meeting is suitable for senior surgeons and physicians right through to basic trainees in these disciplines. Nurses involved in all aspects of gastroenterology will also find the meeting enjoyable and informative. In addition to the core program, we have planned a dedicated half-day, hands-on training workshop for trainees and EUS nurses on Day two. An informal atmosphere encourages questions, discussion and debate.

What is EUS Australia 2018

EUS Australia 2018 is a state of the art, national meeting focused on the current and future utilities of endoscopic ultrasound in the diagnosis and management of various gastroenterological disorders. This meeting offers comprehensive, yet succinct, reviews of the current understanding of disease states, their diagnosis and management. The live demonstrations aim to show-case both basic and advanced techniques in the performance of EUS. We will focus on the latest advances in EUS which broaden our diagnostic and therapeutic capabilities.
